

Dear FCC,

I wish to add my two cents. It is wrong to allow cell phone chatter on airplanes---

please don't do it. It so annoying to be forced to listen in on someone's one-sided

conversation, especially when you are a captive audience stuck in a narrow seat for

hours. I care about all the people who have said "no" this horrendous idea.

If you do permit cellphones, it will just give me and probably many others one more

reason not to fly. Thank you.
